Contents

ELECTRONICS AND OPTICS

The scattering of electrons on the grain boundaries: electric conductivity . . . 1
F. Warkusz (Wrocław, Poland)

Dependence of PtSi Schottky diode electrical behaviour on the platinum film thickness and on the annealing process 13
F. La Via, P. Lanza, O. Viscuso, G. Ferla and E. Rimini (Catania, Italy)

Effect of bath temperature on the optoelectronic characteristics of chemically deposited CdS thin films 21
M. T. S. Nair, P. K. Nair and J. Campos (Morelos, Mexico)

Electrochromism in anodic WO_3 films
I: preparation and physicochemical properties of films in the virgin and coloured states 35
P. Delichere, P. Falaras, M. Froment, A. Hugot-Le Goff and B. Agius (Paris, France)

Electrochromism in anodic WO_3 films
II: optical and electrochromic properties of coloured "distorted" hexagonal films 47
P. Delichere, P. Falaras and A. Hugot-Le Goff (Paris, France)

Kinetic properties and energy transfer in the electroluminescence of thin film cells based on ZnS:Mn 59
E. Chimczak and M. Bertrandt-Żytkowiak (Poznań, Poland)

Electrochromic characteristics of La_2O_3–WO_3 thin films 67
L. Zhang and K. S. Goto (Tokyo, Japan)

Study of lead(II) chloride solid electrolyte thin film galvanic cells doped with alkali chlorides 77
R. N. Prasad, N. M. Abhyankar, T. S. Rao, S. D. Phadke and R. N. Karekar (Pune, India)

Field-assisted ion exchange for the detection of localized defects in thin films on glass substrates 85
B. G. Pantchev and P. Danesh (Sofia, Bulgaria)

A new Richardson plot for non-ideal Schottky diodes 93
A. S. Bhuiyan, A. Martinez and D. Esteve (Toulouse, France)

Optical properties of as-grown and reduced TeO_2 films 101
A. Mansingh and S. Kumar (Delhi, India)

METALLURGICAL AND PROTECTIVE COATINGS

Mechanical properties of r.f. magnetron sputtered W–C films on stainless steel 107
P. K. Srivastava, V. D. Vankar and K. L. Chopra (New Delhi, India)

Characterizing the hardness and modulus of thin films using a mechanical properties microprobe 117
W. C. Oliver and C. J. McHargue (Oak Ridge, TN, U.S.A.)

PREPARATION AND CHARACTERIZATION

Effect of electron irradiation on the growth of thin antimony layers deposited on collodion and on carbon in a vacuum of 10^{-4} Pa 123
M. Hashimoto, M. Itoh, H. Kuramochi and J. Takei (Tokyo, Japan)

Rapid thermal annealing of arsenic–phosphorus (n^+–n^-) double-diffused shallow junctions 131
D. L. Kwong, Y. H. Ku (Austin, TX, U.S.A.), N. S. Alvi (Kokomo, IN, U.S.A.)

Effect of deposition rate on structure and properties of As_2S_3 film 139
K. White, B. Kumar and A. K. Rai (Dayton, OH, U.S.A.)

Electron spin resonance studies on the superlattices PbTe–$Pb_{1-x}Eu_xTe$ prepared by hot wall epitaxy. 149
T. Nakamura, A. Ishida and H. Fujiyasu (Hamamatsu, Japan)

High capability, quasi-closed growth system for isothermal vapour phase epitaxy of (Hg, Cd)Te 157
J. Piotrowski, Z. Nowak, M. Grudzien, W. Galus, K. Adamiec (Warsaw, Poland), Z. Djuric, V. Jovic and Z. Djinovic (Belgrade, Yugoslavia)

Growth of $Pb_{0.82}Sn_{0.18}Te$ by molecular beam epitaxy 171
T. Srinivasan, P. R. Vaya and J. Sobhanadri (Madras, India)

Effect of Si_3N_4 encapsulation on the thermal processing of hydrogenated amorphous silicon 181
J. O. Olowolafe (Ile-Ife, Nigeria)

A few electronic properties of thin films of plasma-polymerized acrylonitrile . 187
A. H. Bhuiyan, N. R. Rajopadhye and S. V. Bhoraskar (Pune, India)

Some properties of $ReSi_2$. 197
C. Krontiras, L. Grönberg, I. Suni (Espoo, Finland), F. M. d'Heurle, J. Tersoff (Yorktown Heights, NY, U.S.A.), I. Engström (Uppsala, Sweden), B. Karlsson (Älvkarleby, Sweden) and C. S. Petersson (Stockholm, Sweden)

Photovoltaic study of anodically grown oxide films on Ag–Cu alloys 207
E. Tselepis and E. Fortin (Ottawa, Canada)

Formation of texture in vacuum-condensed tin on glass 213
E. Grantscharova and D. Dobrev (Sofia, Bulgaria)

X-ray diffraction study of phase composition and amorphization in magnetron-sputter-deposited thin films of stainless steel–titanium 223
S. C. Grudeva, M. J. Kanev (Russe, Bulgaria) and N. S. Zotov (Sofia, Bulgaria)

Thin film interaction of aluminium and hafnium: influence of copper and silicon 235
R. K. Ball, W. G. Freeman and A. G. Todd (Wembley, U.K.)

A choice of the optimum density of ion bombardment by ion-assisted physical vapour deposition of films 249
G. I. Grigorov, I. N. Martev (Sofia, Bulgaria), J.-P. Langeron (Vitry, France) and J.-L. Vignes (Cachan, France)

Efficiencies of InAs transport and epitaxial growth by chemical vapour deposition in the system InAs–$AsCl_3$–H_2 257
E. P. Trifonova and L. Hitova (Sofia, Bulgaria)

Partial epitaxial growth of $NbSi_2$ on Si(111) 263
C. S. Chang, C. W. Nieh, J. J. Chu and L. J. Chen (Hsinchu, Taiwan)

Indium tin oxide films from metallo–organic precursors 273
J. J. Xu, A. S. Shaikh and R. W. Vest (West Lafayette, IN, U.S.A.)

The depth profile of the elements in lead chalcogenide layers 281
A. N. Kovalev and V. V. Korablev (Helsinki, Finland)

The deposition and film properties of reactively sputtered titanium nitride . . 289
R. C. Ellwanger and J. M. Towner (Sunnyvale, CA, U.S.A.)

LANGMUIR–BLODGETT AND RELATED FILMS

Langmuir–Blodgett films of acetalized poly(vinyl alcohol)s 305
K. Oguchi, T. Yoden, Y. Kosaka, M. Watanabe, K. Sanui and N. Ogata (Tokyo, Japan)

The characterization of Langmuir–Blodgett films of a non-linear optical, side chain liquid crystalline polymer 315
M. M. Carpenter, P. N. Prasad (Buffalo, NY, U.S.A.) and A. C. Griffin (Hattiesburg, MS, U.S.A.)

Surface pressure dependence of molecular tilt in Langmuir–Blodgett films of 22-tricosenoic acid 325
I. R. Peterson (Wembley, U.K.), G. J. Russell (Durham, U.K.), J. D. Earls and I. R. Girling (Wembley, U.K.)

GENERAL FILM BEHAVIOUR

Modelling of ^{18}O tracer studies of the oxygen redistribution during formation of SiO_2 layers by high dose implantation. 333
H. U. Jager (Dresden, G.D.R), J. A. Kilner, R. J. Chater (London, U.K.), P. L. F. Hemment, R. F. Peart and K. J. Reeson (Guildford, U.K.)

Change in water vapour adsorption kinetics in chemically vapour deposited

SiO_2 films after ion irradiation 343
G. M. Tseytlin, A. G. Noskov, N. N. Gerasimenko and S. I. Stenin (Novosibirsk, U.S.S.R.)

Phase transition in adsorbed layers
IX: the influence of geometric and energetic factors on gas–liquid–solid equilibria in two-component monolayers formed on crystalline solid surfaces. 351
A. Patrykiejew (Lublin, Poland)

Orientational effects in adsorption
IV: application of the van der Waals theory to the description of submonolayer films of linear molecules on solid surfaces 367
A. Patrykiejew, S. Sokołowski and Z. Sokołowska (Lublin, Poland)

LETTERS

A comparative Rutherford backscattering spectrometry and Auger electron spectroscopy depth profile study of Fe–N films L69
H. De Rugy (Rueil Malmaison, France), J. P. Langeron, S. Bouquet, L. Minel (Vitry-Seine, France), G. I. Grigorov and I. N. Martev (Sofia, Bulgaria)

A study of the properties of the low temperature chemically vapour deposited phosphosilicate glass films L71
C. Pavelescu, C. Cobianu, N. Vlahovici and C. Ghita (Bucharest, Romania)

Hall effect in conducting Langmuir–Blodgett films of a ternary tetracyanoquinodimethane salt L73
J. Richard, M. Vandevyver, A. Barraud (Gif sur Yvette, France) and P. Delhaes (Talence, France)

Polyurethane coatings for integrated optics applications L79
S. K. Kapoor, C. D. Pandey, J. C. Joshi, A. L. Dawar, K. N. Tripathy and V. L. Gupta (Delhi, India)

Dipole–dipole interaction in the diffused interlayer of magnetic superlattices . L83
A. Maeda and H. Kuroda (Ibaraki, Japan)

Influence of temperature on the growth of TiN films by plasma-assisted chemical vapour deposition L87
F. H. M. Sanders and G. Verspui (Eindhoven, The Netherlands)

Preparation of W–C thin films by reactive r.f. sputtering and Auger electron spectroscopy surface characterization L91
K. Machida, M. Enyo and I. Toyoshima (Sapporo, Japan)
